Blower Sets and Bare Shaft Blowers

<http://www.ibsblowers.com>

Blower Sets - Now up to 9,400 m3/hour

IBS have fully packaged roots type Blower Sets available to minimise our customers down-time in the event of :

- Emergency breakdown
- Planned repair/maintenance/upgrades
- Short-term demand for extra air
- Testing of new systems
- Accidental damage

Certified contract lifting available

Our newly extended range features :

- Air volume flow rates between **30 and 9,400 m3/hour FAD, oil free**
- Pressure differentials up to **1.0 bar**
- Variable speed drives
- Acoustic attenuation
- Units **based in UK locations** for fast delivery

Generator Sets available

Larger Blower Sets are supplied complete in a transport frame fitted with acoustic panels and variable speed drives to optimise performance and lower operational costs. Smaller sets are available either in transport frames or as bedplate sets (without acoustic enclosure/panels).

Sets are supplied complete with electric motor drive and air ancillaries. Pipework/hose and fittings can also be supplied to suit customers connection point.

For remote applications or where the usual power supply is unavailable, Generator Sets can be supplied complete with fuel tanks and load cables. Standby and Unlimited usage rates are available. For Unlimited use or prolonged running periods, IBS can eliminate the customers need to manage fuel requirements by offering this as part of our service.

IBS also have a range of **rotary vane, side channel and claw type** machines for pressure applications with discharge pressures up to 2.0 bar gauge.

Bare Shaft Blowers - Now up to 11,000 m3/hour

Where removing a bare shaft blower for repair, reconditioning or replacement (all of which IBS can undertake for you) we can offer bare shaft machines as an interim measure to keep the system running. Blowers from all major manufacturers are available for direct interchange eliminating the need for modification work or a set hire.

IBS can provide support for :

- Emergency breakdown
- Planned repair/maintenance
- Accidental damage

Our range features :

- Air volume flow rates between **200 and 11,000 m3/hour FAD, oil free**
- Pressure differentials up to **1.0 bar**

A selection of our bare shaft hire blowers

Equipment available for :

- **Immediate despatch**
- **Nationwide delivery/collection**
- **Short or long term hire**

Supplementary services available :

- **Blower removal/installation**
- **Blower repair/reconditioning**
- **New blower supply**
