innovation in sheetmetal work

PAG Sheetmetal Limited PLANT & CAPABILITIES

Design to Manufacture with CAD/CAM

- Radan 2D and 3D Modelling
- Import all files to finished part
- Radan e2i
- Bar coding product tracking

CNC Punching & Laser Cutting

- LVD HELIUS
 - i) 3000 watt laser
 - ii) Cut mild steel- max 20mm
 - iii) Cut stainless steel- max 12mm
 - iv) Cut aluminium- max 8mm

Note: We also cut plastics, wood and polycarbonates

- 20 Turret Shape Delta 2 – 2 Indexing Heads
- Single Turret Strippit

Forming

- 3 meter 100 ton Promecam, with Hurco Control
- 2 meter 50 ton Amada 50*20 APX

Welding

- Plants TIG, MIG AND ARC
- All forms of welding undertaken
- Spot Welding

Automatic Grinding & Polish

- Onsite Polishing Shop
- 2500*1250 Surface Grainer
- All Polishing and grinding undertaken

Bush and Nut Insertion

- Sertabush

Rolling

- Power Rollers

Turning

- Numerous CNC Mill & Machining Centres

Cutting

- Guillotine - cuts up to 3 meters wide
 - i) Cuts 6mm thick Mild Steel
 - ii) Cuts 3mm thick Stainless Steel

Powder Coating

- All powder coating - please enquire for specificity

Finishing

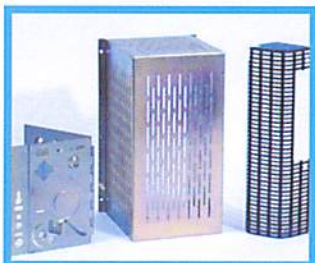

- Paint
- Plating
- Anodise
- Chemical black
- Galvanise
- All finishing'

Assembly & Packaging

- Full Assembly, testing and packaging facility

Deliveries

- PAG Sheetmetal owned fleet of vehicles

PAG Sheetmetal Limited

Unit 4, River Brent Business Park, Trumplers Way, Hanwell, London W7 2QA
